PEDIATRICS

SIZE and FLEXIBILITY in one

Children with hearing loss deserve the very best – as do the teachers and parents who strive to educate and support them. That’s why Oticon focuses on making FM solutions as child-friendly as possible. Therefore, we have developed the new Amigo R12 receiver with a number of unique benefits.

DEDICATED to SMALL ears

Innovative, energy-saving technologies make the Amigo R12 the FIRST FM receiver to work on a 312 battery with Oticon Epoq, Vigo Pro, and Vigo. So now these small devices can retain their cosmetic appeal - and have a better fit for small ears.

FREEDOM to TEACH

Busy teachers won’t have to worry whether the FM system is synchronized and working correctly, because the Amigo R12’s LED light instantly confirms it.

More BANDWIDTH - more SPEECH

With its 7.5 kHz bandwidth, the Amigo R12 solution provides good access to the speech cues the child needs to hear and can help improve comprehension at school.

An OPEN systems approach

Oticon has taken an open systems approach to FM since we believe that FM solutions should be able to match with other systems. To give professionals this opportunity, we have made Amigo extremely flexible. Its frequency response and compression strategies are compatible with most FM systems available. Also, schools will not have to exchange entire inventories of equipment, as Amigo offers the full range of benefits when used with older FM products.

Slide Amigo R12 on

Close the battery door

Lock the battery door

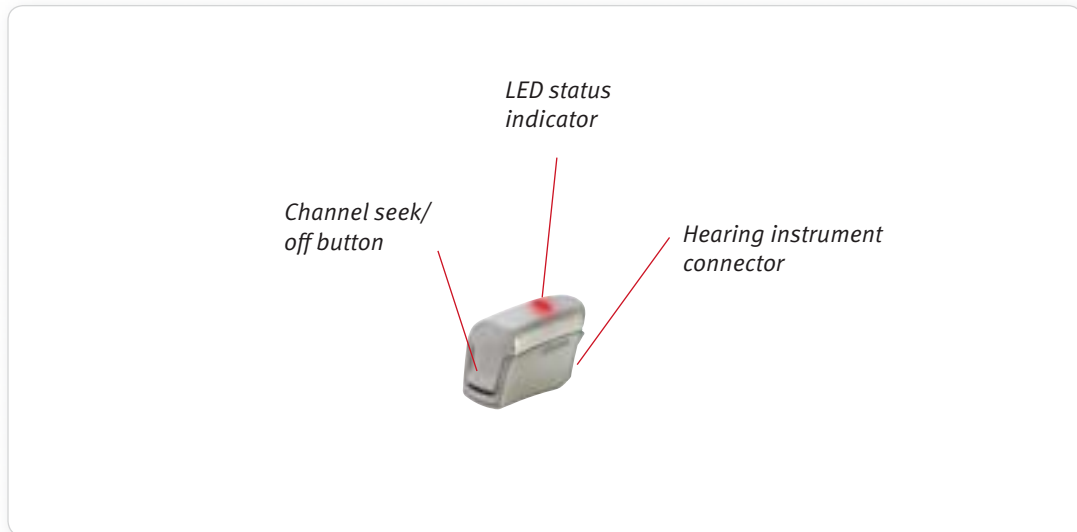

NO SHORTCUTS

Our approach is to take state-of-the-art hearing instruments, make them exceptionally easy to fit, and add a perfectly integrated receiver to optimize the performance of both components. An added bonus is that the Amigo R12 can be purchased and serviced entirely separately; the optional tamper-resistant lock keeps it securely in place.

How Amigo FITS into the CLASSROOM:

- Amigo's frequency response and compression strategies are compatible with other FM systems.
- Amigo transmitters can easily be reprogrammed to match other manufacturers' receivers.
- The receiver will locate the correct channel within seconds, provided that the transmitter is within a range of up to 100 feet.
- Amigo's durable design withstands tough classroom conditions, reduces downtime and keeps children learning.

Amigo R12 receiver actual size

- Wireless synchronization
- Audio bandwidth 100 Hz - 7.5 kHz
- Channel seek/off button
- Wireless handheld programming
- Battery-saving SLEEP and OFF modes
- Multi-channel capabilities
- Secure interlocking connection
- Tamper-resistant lock option

It takes a truly dedicated approach to help children with hearing problems achieve their full potential. That's why we deliver the solutions and services professionals and caregivers need to provide children the opportunities they deserve. This is what *child-friendly hearing care* is all about.
